## Career Objective

Master of Information Technology graduate from the University of Wollongong, majoring in Enterprise Networks, looking for a junior full-stack or front-end web developer position. I am a **permanent resident** and I received Pearson Test of English score **82/90**.

My goal is to apply my web development skills and teamwork skills to make valuable contributions to your business. I am keen on learning, and I am prepared to enter the industry; I believe I will make massive progress soon in the future.

## Technical Skills

| | |
|---|---|
| **Front-end:** | **ReactJS**, **Material UI**, **Bootstrap4**, **SASS**, **HTML5**, **CSS**, **JavaScript-ES6**, **Gatsby** |
| **Back-end:** | **NodeJS**, **Express**, **RESTful API**, **MySQL, MongoDB** |
| **CMS:** | WordPress |
| **Programming Language:** | PHP, Python, Java |
| **Version Control**: | Git, GitHub |

## Full Stack Web Project Experience

**Property Management System** (a private team project, ongoing)

**Front-end**: React, Material UI, Axios

**Back-end**: NodeJS, Express, REST API

**Database**: MySQL

**Server Platform**: AWS

**Version Control**: Git, GitHub

My Responsibility:

- Working within a team of iShare Incubator, receiving UX design from PM, discussing efficient page logic
- Creating user friendly UI and correlative page logic
- Creating table list pages that fetch data from MySQL, results are based on front-end page's filter or search keywords, then display the results in table, tabs or autocomplete input area
- Creating registration/update form pages with validation, including whether user name already existed, restrict the type of user's input, then insert data into multiple database table
- Creating REST API with Express.js routing in Node.js and creating MySQL query, view
- Managing project's page redirect with efficient path URL naming in React routing

## Professional Experience

**Full Stack Developer Intern**                                        **April 2020 – August 2020**

iShare Incubator, Wynyard

**Key Responsibilities:**

- Working with a team to create a property management web application, creating functional page components, coding correlative front-end and back-end

- Understanding the business model of real estate industry

**Front-end Developer Intern**                                    **Oct 2018 – Jan 2019**

Netstripes, Pyrmont

**Key Responsibilities:**
- Assisting WordPress theme development based on designs
- Understanding digital transformation solutions
- Administrating in-use third-party CRM platforms, managing website's plugins
- General IT troubleshooting

## Education

## Personal Attributes

### Self-learning Ability

I am an excellent self-learner. I can learn practical coding skills by myself. I utilize online resources very well, and I always enjoy learning and making progress.

### Creativity and Open-mind

As a creative individual, I always have strong interests in UI design, UX and audio editing. I tend to think differently and focus on details. I always have a passion for learning from more experienced people.

### Hard-working and able to work under pressure

While at university, I once undertook six subjects in a semester. While during my internship at Netstripes, I always work one extra hour for my placement company.

### Perfectionist

I enjoy spending my time on coding website project until I feel fully satisfied, and I highly enjoy my efforts been recognized.
